# 1. Introduction

A project that mimics Laravel's validation features. I found Python's default validation tools super frustrating, so I made this 😊

The goal is to replicate Laravel's validation system as closely as possible, while adding and optimizing functionality.

## 2. Installation Guide

1. Clone the project (make sure Git is installed)

```
git clone https://github.com/ho0527/chrisvalidation/
```

2. Navigate to the project directory

```
cd chrisvalidation
```

3. Install Python (make sure to add it to your system PATH)
4. Run the following command to install required packages

```
pip install -r requirements.txt
```

5. If you encounter any bugs, issues, or installation problems, feel free to report or ask 😊

### 3. Usage Instructions

After downloading, you can use it with either `from validation import *` or `from validation import validate`

## 4. System Requirements

- Windows 10 or above
- pip 3.2 or above
- pip 24.0 or above

*Compatibility with other platforms not guaranteed*

## 5. Feature List

[See documentation](#)

## 6. Development History

# 10. Contact Info

Name	Role	Contact
Ho Hao-Chun (Chris)	Full-stack Developer	gmail: chris960527ho@gmail.com, line: ho960527, discord: chris0527, github: ho960527, phone: +886 0906585605

## 11. To-Do

- More validation rules
- Ensure code security and efficiency

## 12. Notes and References

### Notes

this note is write by chatgpt, maybe will have some mistake.
